

PROJECT:

FOOD ORDERING

COMPANY:

HUDA'S TECHNOLOGIES

GUIDE:

MR. SYED WAIZ

MR. SADRUL

INTRODUCTION:

the main objective of the website is to design a user-friendly interface for the customer who wants to order food online with the wide variety of choice in our menu.

SUMMARY:

The website came into coding from 10th may 2019. There are four members in our group the front end and designing is done by Team leader-Shubham Modi, Shohrat Ali. The Backend development is done by Ashin & Punam.

WORK DONE:

The First Phase in which we acquired all the information regarding the website what all things should it require which all modules would be there after that we worked on the front end and designing part

1. Home Page – Mostly done.
2. Login Page- frontend done backend left.
3. Menu Page – done.
4. Cart -running well some issues will be solved.
5. Database -50% ready
6. Contact Page- frontend done Backend left.

UPCOMING:

In the next phase we would be completing the front-end part of the website will be done once it is completed the team would look into the backend part.
